

THE DESIGNERS DEVELOPER

Backups & Maintenance for Wordpress.

Website Backups.

- Wordpress.

Protect your website with a backup that will serve you reliably and consistently.

Once your website is online we can provide you with daily website backups for a monthly fee. This means that if something were to happen on your server or to your site, we can revert you back to the closest working version.

We chose to keep this pricing low, why? Well not only are backups piece of mind for you but also for us.

Let's all sleep well at night.

Website Maintenance.

- Wordpress.

Keep your website running with
wordpress security updates,
bug-fixes and speed improvements.

Under the website maintenance program we check in at the end of every month to see if there are any plugin or core wordpress updates. These may be new wordpress features, bug fixes, important security updates or speed increases.

Much like buggy releases of early iPhone/android updates these core updates can have the same issues. We will first test these updates on our local version of the website and if all things look stable the live website will be updated to match.

Ensuring less downtime and more business.

Base

\$18.00

/month

-  security updates
-  bug fixes
-  core feature updates
-  speed improvements

cancel at any time

Value Package. - Recommended.

Daily Backups + Base Maintenance.
